## Principal's Message

Taking the initiative to fund your future is a significant step for any student, and starting as early as 6th grade demonstrates a strong desire to succeed. The Take Stock in Children's scholarship program recognizes this effort and awards students a 2-year Florida prepaid scholarship for their college or technical school education after high school.

During Saturday school on April 20th, seven students attended a scholarship essay workshop with Ms. Diana to complete their scholarship essays. The program has opened up to 6th graders for the first time, and these students worked diligently on their essays, receiving feedback and making their applications competitive. It is inspiring to see young students planning for their future and working towards their goals, even on a Saturday! Thank you Ms. Diana for all of your support of scholars in middle school and beyond!
