### Students Making an Impact

7th and 8th grade Grange scholars came together to make a positive impact by participating in a campus clean-up, showing pride in their school and care for the environment. Working in teams, they collected litter, refreshed common areas, and helped create a cleaner, more welcoming space for everyone. The event highlighted the power of community action and demonstrated how small efforts can lead to meaningful change. We hope to instill in all scholars taking the time to keep our campus looking nice and fostering pride in self and school.
