IMMUNIZATION DAY!

Written by Mark Haggett

Our September 25th immunization event, held in partnership with Central Florida Health Care, successfully provided required vaccinations to 25 MCA students who had missing or incomplete immunization records. Many of the students served were HEARTH students, whose families often face challenges accessing transportation, appointments, and follow-up care. To help remove these barriers, Mrs. Damaris and Mr. Luis provided transportation assistance, bringing parents to and from the school. In addition to student immunizations, parents and siblings who attended were able to receive free flu shots, and six MCA staff members also received their annual flu vaccinations. Overall, the event expanded access to preventive healthcare services for families and staff. MCA is grateful to Central Florida Health Care for its partnership and support in making this possible.
